20-Year TOTALS	ALL CHARGES	~\$1,220,005 ★	~\$1,781,539 ■	~est.	~\$1,200,000 est.
---------------------------	--------------------	-----------------------	-----------------------	-------	--------------------------

■ KEY FLAGS: (1) JH Year 1 admin charge (\$24,870) and Year 10 admin (\$64,425) are very high — JH embeds most charges in admin/issue vs other carriers. (2) Nationwide has the HIGHEST premium load at 8.0% in Year 1. (3) Pacific Life front-loads the COI in early years (LTP design) but it drops significantly after Year 5 — this is the 'Long-Term Performance' design feature. (4) JH's underwriting class is STANDARD SMOKER while PAC, SEC, NW are STANDARD TOBACCO — if Monaj qualifies for PREFERRED TOBACCO, JH's charges would drop materially.

3. INDEX ACCOUNTS — CAPS, FLOORS, PARTICIPATION RATES & HISTORICAL RETURNS

Carrier	Account Name	Index	Cap Rate	Participation	Floor	25-yr Avg or Max Illus.	≥ 7.5%?	Account Charge
Pacific Life	1-Yr Indexed (main)	S&P; 500	10.00%	100%	0%	6.72% (25-yr avg)	✗ NO	None

	Hindsight Multi-Index ★	S&P;/Russell/Nasdaq blend	8.25% cap	60/40/0 best-of	0%	Max illus 8.25% ✓	✓ YES	None
	Performance Trigger	S&P; 500	Trigger-based	N/A	0%	Max illus 6.62%	✗ NO	None
Nationwide	S&P; 500 PtP (main)	S&P; 500	10.50%	100%	0%	Max illus 6.59% ■	✗ NO ■	None
	Multi-Index 14.5% cap	Multi-Index blend	14.50%	100%	0%	Max illus 6.59% ■	✗ NO ■	None
	Multi-Index High-Cap ★	Multi-Index blend	25.00%	100%	0%	Max illus 7.18%	~Marginal	0.55%/yr
	Nasdaq Monthly Avg	Nasdaq-100	15.50%	100%	0%	Max illus 6.59% ■	✗ NO ■	None
	BNPP Global H-Factor 300% ★	BNPP H-Factor	Uncapped	300% par (65% guar)	0%	Max illus 7.40%	~Marginal	0.75%/yr

■ NATIONWIDE RED FLAG: ALL Nationwide index accounts have a maximum illustrated rate of 6.59% or below — NONE can illustrate above 7.5%. The highest is 7.40% (BNPP Select with 0.75% charge). With SOFR+1% loan rate of ~5.3-5.5%, the maximum arbitrage at Nationwide is only ~1.0-1.9%. This is dangerously thin. Any rate increase or underperformance eliminates the spread entirely.

4. ARBITRAGE ANALYSIS — POLICY RETURN vs LOAN COST (SOFR+1%)

Carrier	Account Used	Expected Return	Loan Rate (SOFR+1%)	Arbitrage (Return - Loan)	≥ 7.5% Return?	Status
ALL — Illustrated	6% base illustration	6.00%	5.35%	+0.65% ← VERY THIN ■	✗ NO	Insufficient
Pacific Life	1-Yr S&P; 10% cap	6.72% (25-yr avg)	5.35%	+1.37%	✗ NO	Thin
	High Cap 12% ★	7.89% (25-yr avg)	5.35%	+2.54%	✓ YES	Acceptable
	QQQ 10.5%	7.46% (25-yr avg)	5.35%	+2.11%	~Marginal	Borderline
John Hancock	Base Capped 11.65%	7.39% (25-yr avg)	5.35%	+2.04%	~Marginal	Borderline
	Nasdaq 14% ★★	9.11% (25-yr avg)	5.35%	+3.76% ★	✓ YES ★★	Strong ★
	High Capped +30% mult	9.94% (25-yr avg)	5.35%	+4.59% ★	✓ YES ★★★	Very Strong ★
Securian	S&P; 500 10.5% cap	6.93% (compound)	5.35%	+1.58%	✗ NO	Thin
	Hindsight Multi-Index ★	8.25% (max illus)	5.35%	+2.90%	✓ YES	Good
Nationwide	S&P; 500 10.5% (main)	6.59% (max illus) ■	5.35%	+1.24% ■	✗ NO ■	■ FLAGGED
	Multi-Index High-Cap 25%	7.18% (max illus)	5.35%	+1.83%	✗ NO	Thin ■
	BNPP Select 300% par	7.40% (max illus)	5.35%	+2.05%	~Marginal	Below threshold ■

SOFR assumed at 4.35% (May 2026 approximate). Loan rate = SOFR+1% = 5.35%. For premium financing to generate meaningful wealth, the policy needs to earn at LEAST 7.5% for a 2%+ spread. Accounts earning below 7.5% are flagged. JH Nasdaq (9.11%) and High Capped (9.94%) offer the strongest arbitrage. Nationwide's ENTIRE account lineup is below or at the 7.5% threshold — its max illustrated rate of 6.59% produces only a 1.24% spread. If SOFR rises to 5%+, Nationwide's illustrated scenario has NEGATIVE arbitrage.

5. POLICY VALUE COMPARISON AT KEY MILESTONES (All at 6% illustrated)

Year / Age	Pacific Life	John Hancock ■	Securian (MN Life)	Nationwide
Year 1 / Age 48	\$291,720	\$329,079	~\$354,311 est.	\$335,711
Year 5 / Age 52	~\$1,530,320	~\$1,892,360	~\$1,529,251 est.	~\$1,754,741
Year 10 / Age 57	\$3,931,944	\$3,923,656	~\$3,980,296 est.	\$3,804,790
Year 15 / Age 62	~\$7,095,996	~\$6,924,250	~\$7,081,513 est.	~\$6,757,432
Year 20 / Age 67 ★	\$11,316,416 ★	\$11,182,884	\$10,241,142	\$10,604,989
Year 25 / Age 72	~\$13,351,037	~\$13,075,374	~\$11,139,940 est.	~\$15,594,042

■ CRITICAL NOTE ON JH UNDERWRITING: JH is illustrated at STANDARD SMOKER while all others are STANDARD/PREFERRED TOBACCO. If Monaj qualifies for PREFERRED TOBACCO at JH, its Year 20 value would be significantly higher than shown above — potentially matching or exceeding Pacific Life. Request JH at Preferred Tobacco class before making a decision. Year 25 Nationwide value (\$15.6M) appears highest because premiums stop after Year 25 for others; NW may continue premiums.

6. PROS & CONS — EACH CARRIER AT A GLANCE

Pacific Life	
✓ Preferred Tobacco class = lowest COI for a smoker ✓ Age 90 No-Lapse Guarantee (FREE) — longest NLG of all 4 ✓ Highest Year 20 policy value at 6% illustrated ✓ 5-Year uncapped account (110% par, guaranteed no cap) ✓ LTP design: front-loaded charges → much lower in years 11+ ✓ BlackRock Endura uncapped (200% par) — unique	✗ Main 1-yr S&P; cap only 10% (below 7.5% threshold at 6.72% avg) ✗ High Cap 12% has 0.80%/yr account charge ✗ Front-loaded Year 1 charges (\$95k) look high vs others ✗ No Nasdaq account (uses Invesco QQQ at 10.5% instead) ✗ Max illustrated rate only 6.35% for main account

John Hancock

- ✓ Nasdaq 14% cap — best cap of all 4 carriers (9.11% 25-yr avg)
- ✓ High Capped (12.25% + 30% mult) = 9.94% historical avg
- ✓ Enhanced High Capped (12.65% + 80% mult) = 14% avg (high charge)
- ✓ Vitality PLUS health bonus — unique, can add \$100k-\$500k over 20 yrs
- ✓ Barclays Global MA uncapped (165% par)
- ✓ Lowest annual premium (\$381,790)

- ✗ ■ Illustrated at STANDARD SMOKER — worse class than others
- ✗ If at Preferred Tobacco, values improve significantly (unknown)
- ✗ Admin/Issue charge very high (\$24k-\$65k/yr) vs peers
- ✗ No-lapse guarantee only 15 years (shortest of all 4)
- ✗ High Capped and Enhanced accounts have significant charges (1.98-4.98%/yr)

Securian (MN Life)

- ✓ Lowest Year 20 risk of lapse (bonus interest from Year 11+)
- ✓ Hindsight multi-index (best of S&P/Russell/Nasdaq) — 8.25% max
- ✓ Strong carrier (Minnesota Life = top-tier)
- ✓ Simple transparent structure
- ✓ Fixed loan rate: 4% years 1-10, 4% years 11+ (low)

- ✗ Lowest Year 20 policy value (\$10.2M vs PAC's \$11.3M)
- ✗ Main S&P; cap only 10.5% — below threshold at 6.93% avg
- ✗ Max illustrated rate only 6.62% — thin arbitrage
- ✗ Hindsight blended account is complex and less transparent
- ✗ No dedicated Nasdaq account

Nationwide

- ✓ Highest cap options (25% Multi-Index, 15.5% Nasdaq monthly avg)
- ✓ 300% participation on BNPP H-Factor (uncapped)
- ✓ Multiple index diversification options
- ✓ Competitive COI structure

- ✗ ■ ALL accounts have max illustrated rate BELOW 7.5% threshold
- ✗ ■ Main S&P; max illustrated only 6.59% — FLAGGED
- ✗ ■ Even best account (BNPP Select) max = 7.40% < 7.5%
- ✗ HIGHEST premium load at 8.0% Year 1 (\$31,371)
- ✗ Thin arbitrage at current loan rates; any rate increase = near-zero spread
- ✗ Lowest flexibility — if SOFR rises 1%+, strategy unravels

7. VERDICT & RECOMMENDED ACTIONS

RANKING (Year 20 at 6%)	Carrier	Verdict	Action Required
#1	Pacific Life (PAC)	Best year 20 value, Preferred Tobacco class, Age 90 NLG (free), LTP design drops charges long-term	Use High Cap 12% account (7.89%) NOT the default 10% S&P.; Arbitrage threshold met.
#2	John Hancock (JH)	■ Currently at Standard Smoker — MUST get Preferred Tobacco re-quote. With Nasdaq 14% (9.11% avg), would likely rank #1 overall.	CRITICAL: Request re-illustration at Preferred Tobacco. Switch to Nasdaq 14% account. If at Preferred Tobacco, JH becomes the best choice.
#3	Nationwide (NW)	■ ALL ACCOUNTS below 7.5% threshold. Max illustrated 6.59%-7.40%. Thin arbitrage that evaporates if SOFR rises.	FLAG: Arbitrage concern. Only viable if SOFR stays below 4% for duration. Ask: why are max illustrated rates capped at 6.59%?
#4	Securian / MN Life (SEC)	Lowest Year 20 value (\$10.2M). Main account at 6.93% — below threshold. Hindsight account (8.25%) is viable but complex.	If choosing Securian, allocate to Hindsight Multi-Index account (8.25%), not the main S&P; 10.5% cap.

BOTTOM LINE: Ask your broker to re-run JH at PREFERRED TOBACCO class and allocate to the Nasdaq 14% account. If JH can get Preferred Tobacco underwriting, it becomes the clear winner on arbitrage (9.11% vs 5.35% loan = 3.76% spread). Pacific Life is the best of the 4 as currently illustrated, with the longest no-lapse guarantee (Age 90) and best smoker class. Nationwide should be questioned on why ALL its index accounts are capped at 6.59% max illustrated — this is below the minimum viable arbitrage threshold. All 4 carriers are illustrated at 6% which provides only ~0.5% arbitrage — request each carrier to show you the illustration at the MAX allowed rate, not the conservative 6%.

Values derived from carrier illustrations dated May 18, 2026 provided by Nick Burgess, The Burgess Group. SOFR assumed at 4.35% (May 2026). Historical 25-year averages from carrier documents. Securian and NW estimated values based on available data. JH underwriting class noted as Standard Smoker which affects comparability. Not financial advice. Consult qualified advisors.
