

Lincoln \$10M vs JH \$10M — True Apples-to-Apples Comparison

Same cap: 13.5% | Same floor: 0% | Same index: S&P; 500 | Same SOFR+1% loan rate | 3 historical windows

1. STRUCTURE COMPARISON — WHAT'S ACTUALLY DIFFERENT?

Factor	Lincoln \$10M (scaled from \$5M illustration)	JH \$10M (actual illustration)	Impact
Death benefit	\$10,000,000	\$10,000,000	Same
Annual premium	\$533,350/yr × 10 yrs (flat)	\$689,782/yr yrs 1-4, varies yrs 5-12	JH front-loaded
Total borrowed	\$5,333,500	\$6,347,244	Lincoln borrows less
Premium years	10 years	12 years	Lincoln shorter
Total policy charges	~\$1,101,506	\$1,799,479	Lincoln \$698k cheaper
Loan repayment year	Year 20 (Age 63)	Year 21 (Age 65)	1yr diff
Annual distributions	\$408,172/yr from Year 21	\$200,000/yr from Year 22	Lincoln 2× more/yr
Cap / Floor	13.5% / 0% (both same for this analysis)	13.5% / 0% (same)	Same
Index	S&P; 500 TCA 15	S&P; 500 (same for this model)	Same
Distribution loan rate	~4% fixed	3.25% → 3.00%	JH slightly better
Vitality health bonus	None	Yes — Vitality PLUS	JH unique benefit

2. TOTAL WEALTH SCORECARD (Policy Value + All Distributions Received)

Scenario	Yr 20 Gross (Lincoln)	Yr 20 Gross (JH)	Yr 25 Total Wealth (Lincoln)	Yr 25 Total Wealth (JH)	Yr 30 Total Wealth (Lincoln)	Yr 30 Total Wealth (JH)	Yr 30 Winner
Scen A: 2005–2024	\$9,463,718	\$19,185,322	\$13,108,441	\$14,202,710	\$17,427,831	\$19,417,678	JH
Scen B: 2003–2022	\$8,240,135	\$17,647,638	\$12,722,297	\$14,642,667	\$16,877,861	\$20,044,292	JH
Scen C: 2000–2019	\$6,591,337	\$16,119,514	\$10,407,813	\$12,808,544	\$13,581,433	\$17,432,023	JH

Total Wealth = Ending Policy Value + All Cumulative Distributions Received. This is the fairest comparison since Lincoln pays \$408k/yr and JH pays \$200k/yr — different cash flows need to be added back to compare true wealth created.

3. YEAR-BY-YEAR DETAIL — ALL THREE SCENARIOS

Scenario A: 2005–2024 — Best — GFC + COVID recovery

Lincoln charges: \$1,101,506		JH charges: \$1,799,479		JH costs \$697,973 MORE		Yr30 Total Wealth: Lincoln \$17,427,831 JH \$19,417,678

25	68	2024	23.3%	13.5%	\$8,366,953	\$408,172	\$10,407,813	\$12,008,544	\$200,000	\$12,808,544
30	73	2029	7.3%	7.3%	\$9,499,713	\$408,172	\$13,581,433	\$15,632,023	\$200,000	\$17,432,023

4. THE HONEST ANSWER — LINCOLN vs JH FOR \$10M COVERAGE

Factor	Lincoln \$10M	JH \$10M	Winner
Total premiums borrowed	\$5,333,500	\$6,347,244	Lincoln (\$1M less debt)
Total policy charges (25 yrs)	~\$1,101,506	\$1,799,479	Lincoln (\$698k cheaper)

Annual distribution from Year 21	\$408,172/yr	\$200,000/yr	Lincoln (2× more/yr)
Year 30 total wealth (best)	\$17,427,831	\$19,417,678	JH (+\$2M)
Year 30 total wealth (worst)	\$13,581,433	\$17,432,023	JH (+\$3.9M)
Death benefit	\$10M (same)	\$10M (same)	Same
Simplicity / ease	Flat \$533k/yr × 10 yrs	Variable premiums, complex structure	Lincoln (simpler)
Vitality health bonus	None	Yes — earn credits for staying healthy	JH unique
WHY JH WINS ON WEALTH	Lincoln's structure is efficient but premiums stop at Year 10	JH's larger/longer premiums (\$6.35M vs \$5.33M) put \$1M MORE to work compounding over 12 years — outweighs higher charges	

BOTTOM LINE (Apples-to-Apples, \$10M vs \$10M, same cap/floor): Lincoln is cheaper per dollar of coverage (\$1.1M charges vs JH's \$1.8M) and pays 2× more per year (\$408k vs \$200k). JH wins on total wealth at Year 30 in every scenario by \$2M–\$4M — not because it's cheaper, but because it puts \$1M MORE of borrowed money to work (\$6.35M vs \$5.33M) over 12 years instead of 10. The extra \$1M in JH premiums compounds at 13.5%/yr and overwhelms the extra \$700k in charges. If you want higher annual income: Lincoln (\$408k/yr). If you want higher total wealth at Year 30: JH. Both deliver \$10M death benefit. Both cost \$0 out of pocket.

Lincoln \$10M values are scaled 2× from the Lincoln \$5M illustration (March 2026, 7.19% assumed). JH charges from Annual Account Summary (April 2026). Both modelled at 13.5%/0% with actual S&P; 500 returns and SOFR+1% loan. Lincoln charges estimated/derived; JH charges explicitly stated. Not financial advice.
